**Learning the Multiplication Facts:** As my daughter moved into learning her multiplication facts I looked around for the kind of multiplication practice that would help her. The math book she was using went through the math facts a bit too quickly for her. She needed quite a bit of repetition and wanted bright, colorful worksheets. I wound up making my own sets of practice pages and games. She loved that! Be sure to check out our Multiplication Bundle here: [Learning the Multiplication Tables 2s thru 9s.](#)

Each of the **Multiplication Math Packets** I made for ED had a different theme. And as you will see, the packets progressed from fairly easy, straight-forward pages in the first packet to mixed multiplication and division problems by the time she was working on her 8s.

**What order did she learn her math facts?** 2s, 5s, 10s, 3s, 6s and 7s (because those skip counting songs were easy for her!), 4s, 9s, 8s.

Here are some of the activities in the 4s packet:

Many of these are all on sale individually or you can buy the [bundle](#) of all these materials.
