

Human Body Systems

The matching page on the following page is the original worksheet I made for the kids when they were younger. We have a new packet about the Human Body Systems that I put together when the kids were a bit older. You can check out at the link below:

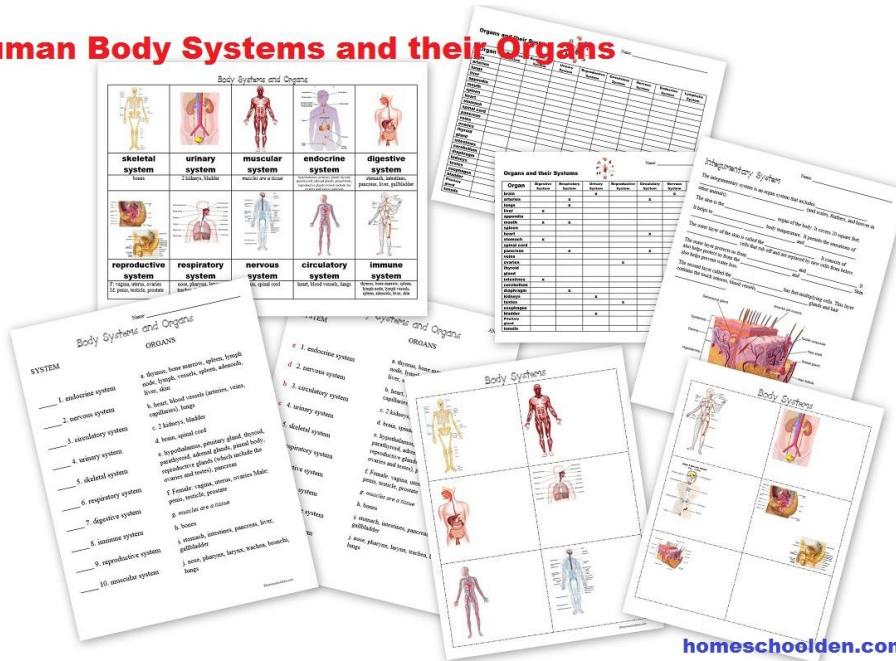

Human Body Systems: From Cells, Tissues, Organs, to Systems

As the kids got older we went into more depth about the human body. This packet discusses how the body is organized from cells to tissue... organs to systems. We went into more detail about the organs in each of the different body systems.

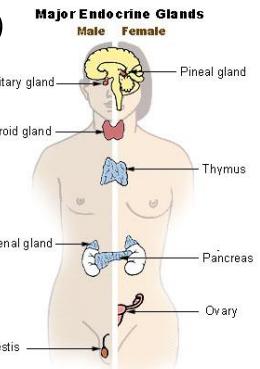

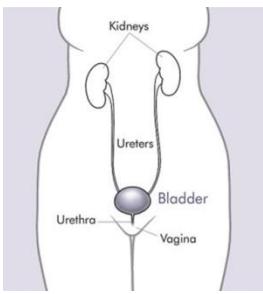

This packet includes the reproductive system as well. This part of the packet also includes the integumentary (skin). The kids took notes on which major organs were associated with each body system. Other days they did sheet a body system to organ matching page, the organs check sheet, and the page about the skin.

Human Body Systems and their Organs

Rocks and Mineral Packet (Free)

Rocks and Minerals Unit

This is a unit I designed for my primary pre-reader, but my older two enjoyed digging right in as well. There are some basic reading, some matching, and some cutting-pasting activities. (There are also blank opportunities for drawing or writing.)

- rocks
- how we use rocks
- types of formations
- types of rocks
- mining
- recycling
- bamboo

Multiplication Packet: Learn the 3s, Practice the 2s, 5s, 10s

The image shows a collection of 20 multiplication worksheets for the 3s, 5s, and 10s. The worksheets are designed for primary school students and include sections for skip counting, multiplication facts, and multiplication trees. Each worksheet features a colorful illustration of a bird. The title 'Multiplication Packet' is prominently displayed in red at the top center. Below it, three main sections are highlighted in blue: '* Learning the 3s', '* Review of the 2s, 5s, 10s', and '* 20 pages of practice'. The website 'homeschoolden.com' is visible in the bottom right corner.
