

Math Practice

Reduce these fractions:

$$\frac{2}{12} = \underline{\hspace{2cm}}$$

$$\frac{3}{12} = \underline{\hspace{2cm}}$$

$$\frac{3}{6} = \underline{\hspace{2cm}}$$

$$\frac{3}{9} = \underline{\hspace{2cm}}$$

$$\frac{3}{21} = \underline{\hspace{2cm}}$$

$$\frac{5}{15} = \underline{\hspace{2cm}}$$

$$\frac{6}{36} = \underline{\hspace{2cm}}$$

$$\frac{7}{56} = \underline{\hspace{2cm}}$$

$$\frac{3}{24} = \underline{\hspace{2cm}}$$

$$\frac{7}{49} = \underline{\hspace{2cm}}$$

$$\frac{5}{10} = \underline{\hspace{2cm}}$$

Equivalent fractions:

$$\frac{2}{3} = \frac{\hspace{1cm}}{21}$$

$$\frac{3}{4} = \frac{\hspace{1cm}}{32}$$

$$\frac{1}{3} = \frac{\hspace{1cm}}{27}$$

$$\frac{1}{7} = \frac{\hspace{1cm}}{49}$$

$$\frac{2}{4} = \frac{\hspace{1cm}}{28}$$

$$\frac{2}{5} = \frac{\hspace{1cm}}{20}$$

$$\frac{2}{8} = \frac{\hspace{1cm}}{16}$$

$$\frac{2}{9} = \frac{\hspace{1cm}}{54}$$

$$\frac{1}{4} = \frac{\hspace{1cm}}{24}$$

Math Practice

Reduce these fractions:

$$\frac{4}{12} = \underline{\hspace{2cm}}$$

$$\frac{3}{21} = \underline{\hspace{2cm}}$$

$$\frac{3}{9} = \underline{\hspace{2cm}}$$

$$\frac{9}{18} = \underline{\hspace{2cm}}$$

$$\frac{6}{24} = \underline{\hspace{2cm}}$$

$$\frac{5}{25} = \underline{\hspace{2cm}}$$

$$\frac{6}{48} = \underline{\hspace{2cm}}$$

$$\frac{7}{49} = \underline{\hspace{2cm}}$$

$$\frac{3}{18} = \underline{\hspace{2cm}}$$

$$\frac{7}{14} = \underline{\hspace{2cm}}$$

$$\frac{2}{14} = \underline{\hspace{2cm}}$$

Equivalent fractions:

$$\frac{1}{3} = \frac{\hspace{1cm}}{24}$$

$$\frac{3}{4} = \frac{\hspace{1cm}}{16}$$

$$\frac{1}{3} = \frac{\hspace{1cm}}{9}$$

$$\frac{1}{7} = \frac{\hspace{1cm}}{56}$$

$$\frac{2}{4} = \frac{\hspace{1cm}}{12}$$

$$\frac{2}{5} = \frac{\hspace{1cm}}{40}$$

$$\frac{2}{8} = \frac{\hspace{1cm}}{32}$$

$$\frac{2}{9} = \frac{\hspace{1cm}}{72}$$

$$\frac{1}{4} = \frac{\hspace{1cm}}{20}$$
