|-----------|-----------|-----------|-----------|-----------|-----------|
| <b>14</b> | <b>2</b>  | <b>7</b>  | <b>16</b> | <b>4</b>  | <b>10</b> |
| <b>6</b>  | <b>13</b> | <b>9</b>  | <b>15</b> | <b>1</b>  | <b>5</b>  |
| <b>17</b> | <b>3</b>  | <b>15</b> | <b>8</b>  | <b>12</b> | <b>18</b> |

| <b>12</b> | <b>7</b>  | <b>6</b>  | <b>3</b>  | <b>8</b>  | <b>17</b> |

You will need 3 dice.

Directions:

- Player 1 tosses the three dice. Using either addition or subtraction, create a number problem with the three numbers on the dice. Cross off the square with that answer. For example, if you rolled a 5, 3 and 6... you could do  $5-3+6=8$  or you could do  $6+5-1=10$ ... So, you could cross off either the square with an 8 or the square with a 10. (Or any other answer that uses all three of the numbers on the dice.)
- A player gets one point for the square they cross off and a point for every square it touches that is already marked off! (Highest possible number of points per round is 9.)
- The player with the most point at the end wins!

Will you survive the Middle Ages?!!!

The "king" sat at the top of the hill in his castle. If you drew certain cards you had to run up the hill to serve the king. To the right, peasants are "working" hard in the fields.

**Learning the Multiplication Facts:** As my daughter moved into learning her multiplication facts I looked around for the kind of multiplication practice that would help her. The math book she was using went through the math facts a bit too quickly for her. She needed quite a bit of repetition and wanted bright, colorful worksheets. I wound up making my own sets of practice pages and games. She loved that! Be sure to check out our Multiplication Bundle here at this post: [Learning the Multiplication Tables 2s thru 9s](#) (or see the purchase link to buy our bundle of 12 pdfs in [Our Store](#)) Here are some sample pictures:

There are actually more than 225 pages... I keep adding to the bundle! 😊

**What order did my daughter learn her math facts?** 2s, 5s, 10s, 3s, 6s and 7s (because those skip counting songs were easy for her!), 4s, 9s, 8s.
