

MEASUREMENTS

Explore with the empty containers you have:

How many cups are in a pint? _____

How many pints are in a quart? _____

How many quarts are in a gallon? _____

A quart is the same thing as _____ gallon.

How many cups are in a gallon? _____

How many pints are in a gallon? _____

MEASUREMENTS

How many teaspoons are in a tablespoon?

How many teaspoons are in a tablespoon?

How many tablespoons are in a cup?

MEASUREMENTS

GALLONS, QUARTS, PINTS, CUPS

1 gallon = _____ quarts

1 quart = _____ pints

1 pint = _____ cups

The large square is like one _____.

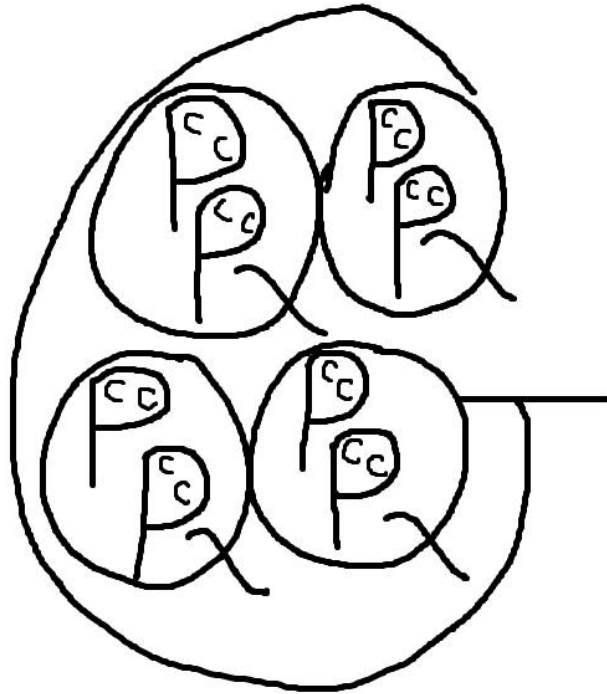

Divide the square into quarters (into 4). Those would be like a _____.

Divide that section in half; that would be one _____.

Divide the small section in half again and the smallest section would be a _____.

Have the kids create their own illustration on paper:

Original idea is from <http://www.thekitchn.com/memory-tricks-remembering-how-52851>

MEASUREMENTS

Look at the illustration you made.

How many cups are in a gallon? _____

How many pints are in a gallon? _____

How many pints are in a quart? _____

If you have six pints, how many quarts is that?

If you have eight cups, how many pints is that?

If you have 12 cups, how many quarts is that?

If you have 3 pints, how many cups is that?
