

Halloween Party

We made a lot of our decorations by hand out of old boxes.

Racing Games Station

Ghost Waiter - Each child carries a paper plate on their hand like a waiter, balance a balloon on top of the plate. Race to the end and back.

Zombie Daylight Darkness - This is played like red-light green light. One person is at the end. When she faces the kids it is **DAYLIGHT** and no one can move. When she faces away from the kids, it is night-time. The kids can move forward like Zombies (no running). When the person at the end turns back, if she spots a zombie moving, that player goes back to the beginning.

Eyeball Races - This is an egg and spoon race. Give each child a plastic spoon and a ping-pong eyeball. Race down to the end and back without dropping the eyeball.

Witch's Broom Race - Each child is given a broom and a balloon. They have to sweep the balloon down to the end and back.

Skeleton Bone Race - Each child is given a half a straw and a paper bone. When it's time to go, the child sucks on the straw and holds the bone on the end of the straw (**NO HANDS!**). The child who gets the farthest before the bone drops off (or the ones who get to the end) win that round.

Under the Witch's Broom- This is the game "LIMBO". Two people hold a broom. Children go under the broom, one at a time bending their back (stomach facing up). The child cannot touch the floor with their hands. If they fall, they are out.
