Halloween Multiplication Races

You will need to make your own die for each game. We purchased wooden cubes from a craft store for this.

Each game has a number in the upper right corner which tells you which multiplication fact family is being practiced. For each game board, you need to make a different die with the following problems.

2s -- write these problems on the wooden cubes $2 \times 4 =$, 2×5 , $2 \times 6 =$, $2 \times 7 =$, $2 \times 8 =$, $2 \times 9 =$

3s -- write these problems on the wooden cubes $3 \times 4 =$, 3×5 , $3 \times 6 =$, $3 \times 7 =$, $3 \times 8 =$, $3 \times 9 =$

4s -- write these problems on the wooden cubes $4 \times 4 =$, 4×5 , $4 \times 6 =$, $4 \times 7 =$, $4 \times 8 =$, $4 \times 9 =$

5s -- write these problems on the wooden cubes $5 \times 4 =$, 5×5 , $5 \times 6 =$, $5 \times 7 =$, $5 \times 8 =$, $5 \times 9 =$

6s -- write these problems on the wooden cubes $6 \times 4 =$, 6×5 , $6 \times 6 =$, $6 \times 7 =$, $6 \times 8 =$, $6 \times 9 =$

7s -- write these problems on the wooden cubes $7 \times 4 =$, 7×5 , $7 \times 6 =$, $7 \times 7 =$, $7 \times 8 =$, $7 \times 9 =$

8s -- write these problems on the wooden cubes $8 \times 4 =$, 8×5 , $8 \times 6 =$, $8 \times 7 =$, $8 \times 8 =$, $8 \times 9 =$

9s -- write these problems on the wooden cubes $9 \times 4 =$, 9×5 , $9 \times 6 =$, $9 \times 7 =$, $9 \times 8 =$, $9 \times 9 =$

Mixed Practice: Create a die that has these problems: 6×7 , 7×8 , 9×8 , 4×7 , 3×8 , 9×9

To Play:

Players take a guess as to which Halloween column will win.

Place 6 tokens across the bottom of the game board.

Players take turns rolling the die and solving the problem. They move the die once space closer to the picture.

When one of the tokens makes it to the end, the round is over!
