

Sight Word Games

Directions:

Print out several copies of the word cards on card stock. (Laminate if desired.)

Each player needs a token to move around the board.

Shuffle the cards well. Place them face down in a pile.

Each player takes a turn taking a card, reading it, and moving his/her token to the next spot on the game board.

The first player to make it into the end square with the correct word wins the game!

There is also a printing practice page that go along with the words in each set of games.
