# Water Cycle Matching

precipitation	The conversion from solid to gaseous phase without changing first to the liquid phase.
evaporation	Water released from clouds in the form of rain, freezing rain, sleet, snow, or hail.
condensation	Evaporation from the land surface plus transpiration from plants.
sublimation	When water vapor in the air changes into liquid water.
deposition	When water vapor changes directly to ice (such as snowflakes or frost).
evapotranspiration	When water changes from a liquid to a gas or vapor.

#### Draw a picture of the water cycle:

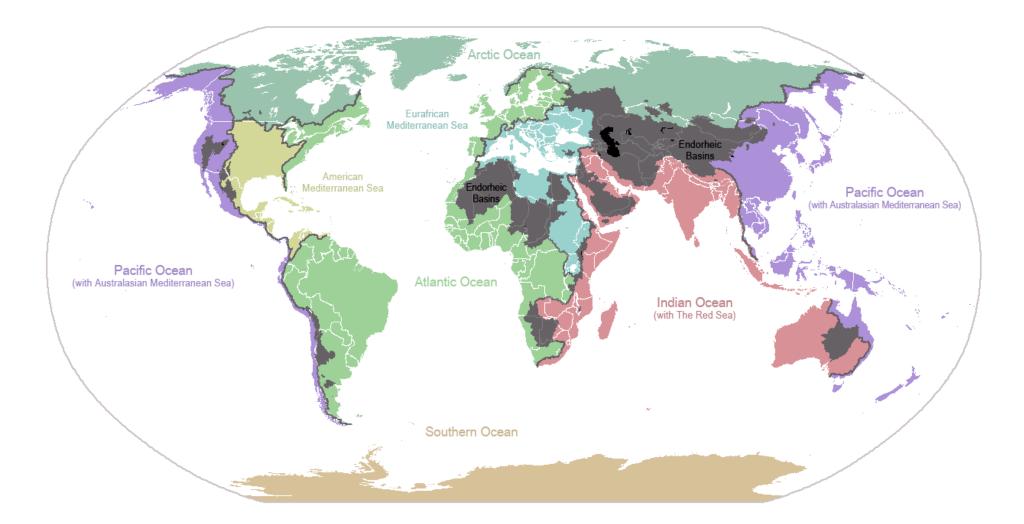

What is a drainage basin or watershed?

On the map below find two examples of a divide. Find four examples of drainage basins:

## Water Cycle Definition:

precipitation: water released from clouds in the form of rain, freezing rain, sleet, snow, or hail.

evaporation: When water changes from a liquid to a gas or vapor.

condensation: When water vapor in the air changes into liquid water.

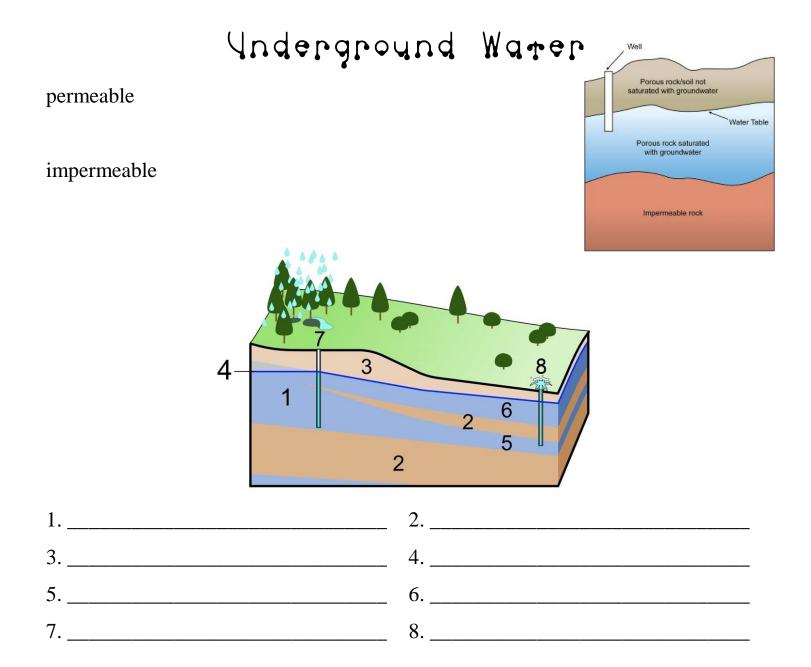

sublimation: The conversion from solid to gaseous phase without changing first to the liquid phase.

deposition: When water vapor changes directly to ice (such as snowflakes or frost).

evapotranspiration: Evaporation from the land surface plus transpiration from plants.

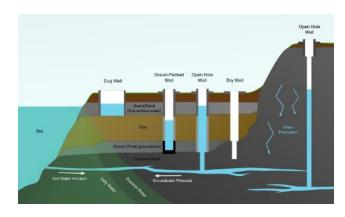

A divide is a ridge or continuous line of high land, from which water flows in different directions.

A drainage basin, or watershed, is an area into which all the water on one side of a divide flows.

#### aquifer

water table

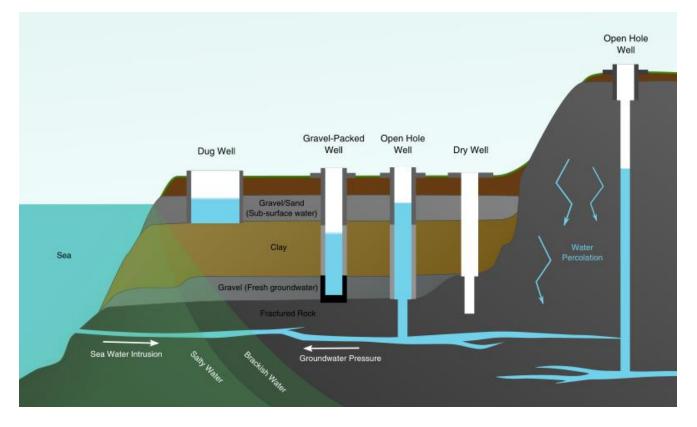

©homeschoolden.com

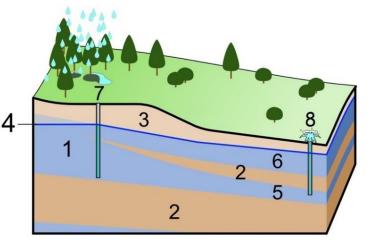

#### Underground Water

**permeable** substance is a substance that liquids can flow through impermeable substance is a substance that liquids cannot flow through water table is the top of the region that is saturated, or completely filled with water aquifer is an underground layer of permeable rock or sediment that contains water aquitard is a zone within the earth that restricts the flow of groundwater from one aquifer to another.

unsaturated – means capable of holding more liquid

 Aquifer 2. Aquitard 3. Unsaturated zone 4. Water table 5. Confined aquifer
Unconfined aquifer 7. Deep well
Artesian well

**Civics and Government Packet:** 

American Revolution Packet (A Study of the causes of and events leading to the American Revolution such as the French & Indian War, Sugar & Molasses Acts, Stamp Act, Boston Massacre, Townshend Acts, Boston Tea Party, Lexington & Concord and more)

#### World Facts Packet:

\*Largest countries

\*Population facts

\*Major world religions

\*Facts about the World: longest river, largest desert, wettest and driest places on Earth, tallest mountain, deepest spot in the ocean, etc.

\*Facts about the US: largest/smallest state, capital, highest mountain, longest river, rivers & lakes sheet, largest cities, neighbors

\*Blank fact sheet pages for: Canada, United Kingdom, Australia, South Africa

\*Famous world landmarks
