

# How to Play Sunny Side Up

\*Make 5 dice with the numbers 1-5 and a sunny face 

I keep a supply of wooden cubes from the hobby store on hand just for occasions like this!

\*Each player gets a Sunny Side Up sheet. (There are 4 on each page below.)

\*Each player takes a turn tossing all 5 dice at once.

\*The player combines the numbers to cross off as many numbers on her score sheet as possible.

\*A sunny side up can be used for any number.

\*For example, if she threw the dice and had the following numbers

3 5 1 5 

She could cross out the numbers 55, 34 (3 ) and 1 on her score sheet.

\*The first person to cross off all her numbers wins.
