Are you taking a road-trip across the country to visit various national parks or to visit family? This travel log might be the very thing to keep your kids excited by everything they see!

I realize that some of you may be sticking closer to home, but may still challenge the kids to identify clouds, go geocaching, collect rocks, find all the constellations, and things like that... so there are two cover options. ☺

Feel free to make as many copies of this file as you'd like for your kids. This file may not be uploaded to any file-sharing website.

# The Fifty States that Rhyme Song Lyrics

Alabama and Alaska

Arizona, Arkansas

California , Colorado and Connecticut and more

Delaware, Florida, Georgia

Then Hawaii, Idaho

Illinois, Indiana, Iowa still 35 to go

Kansas and Kentucky

Louisiana ,Maine

Maryland, Massachusetts

Then good ole Michigan

Minnesota, Mississippi

Missouri and Montana

Then Nebraska's 27, Number 28's Nevada

Next New Hampshire and New Jersey

And way down New Mexico

There's New York , North Carolina, North Dakota, Ohio

Oklahoma, Oregon

Pennsylvania, Now let's see

Rhode Island ,South Carolina, South Dakota, Tennessee

Texas and there's Utah

Vermont I'm almost through

Virginia then there's Washington and West Virginia too

Could Wisconsin be the last one? Or is it 49?

No Wyoming is the last state in the "50 States that Rhyme"

## Cumulus

## Cumulonimbus

## Alto cumulus Cloud

characterized by globular masses or rolls in layers or patches, the individual elements being larger and darker than those of cirrocumulus and smaller than those of stratocumulus

## Contrail

## Stratus Cloud

flat, hazy, featureless clouds of low altitude varying in color from dark gray to nearly white. they exist something like a sheet across a large area identified by their fog-like appearance, lacking the distinguishing features of most clouds

## Nimbostratus

Nimbostratus is a major precipitation cloud - the true rain clouds- They often have very few visual features.

## Altostratus

generally uniform gray to bluish-green and sheet or layer. It is lighter in color than nimbostratus and darker than high cirrostratus. The sun can be seen through thin altostratus, but thicker layers can be quite opaque.

## Stratocumulus

large dark, rounded masses, usually in groups, lines, or waves

## Cirrus

thin, wispy clouds

Cirrus clouds merging to cirrocumulus clouds

## Cirrostratus

high, very thin, generally uniform stratiform genus-type of cloud, composed of ice-crystals

## Cirrocumulus

high, very thin, generally uniform stratiform genus-type of cloud, a great sheet of ice particles above the surface, may look like wind-blown gauze. The sun or moon is always visible through this thin layer of ice crystals.

## Cirrocumulus

form in patches and cannot cast shadows. patchy clouds that often make patterns

## Travel Jokes!!

How can you tell elephants love to travel?

They are always packing their trunk!

### **Everything is big in Texas**

There was a little old lady from a small town in America who had to go to Texas. She was amazed at the size of her hotel and her suite. She went into the huge cafe and said to the waitress, who took her order for a cup of coffee, that she had never before seen anything as big as the hotel or her suite.

"Everything's big in Texas, ma'am," said the waitress. The coffee came in the biggest cup the old lady had ever seen. "I told you, ma'am, that everything is big in Texas," said the waitress.

On her way back to her suite, the old lady got lost in the vast corridors. She opened the door of a darkened room and fell into an enormous swimming pool. "Please!" she screamed. "Don't flush it!"

In Alaska's National Forests, a tourist's guide was giving a talk to a group of tourists about hiking in grizzly bear territory: "Most bear encounters occur when hikers, being extra quiet along the trails in hopes of viewing wildlife, accidentally stumble into bears. The resulting surprise can be catastrophic." To avoid this, he suggested that each hiker wear tiny bells on their clothing to warn the bears of their presence. "Also," he said further, "be especially cautious when you see signs of bears in the area, especially when you see bear droppings." One tourist asked, "How do you identify bear droppings?" "Oh that's easy," the guide explained, "it's the ones with all the tiny bells in them!"

Question: What does a witch get if she's a poor traveler?

Answer: Broom sick.

## A couple other travel activities we added:

Krazy Dad has hundreds and hundreds of free Sudoku puzzles for kids in [4×4 squares](#), [6×6 squares](#) and [8×8 squares](#) and [other sudoku puzzles](#) (that are even harder!). I printed out various puzzles for the kids.

## USA Scratch Maps

Since we will be traveling across the country this summer on a trip out West, I thought the kids might really enjoy doing a [scratch map](#) (*affiliate link*) as we made our way across the country. I decided to go with a larger (almost poster size map 33inches x 23 inches because it also had the highways. I thought that would be a bit more fun and figured we would keep our scratch map in a poster tube.

There is also a smaller USA scratch map that is closer to 8x11 in size: [USA Scratch Map](#). (*affiliate link*)

## World Scratch Maps

If you travel abroad a lot or are studying a lot of countries in your homeschool, you might enjoy this [Scratch Off Bucket List World Map](#). (*affiliate link*) Just note that you cannot scratch off individual U.S. states with the map below.

## Mess-Free Art on the Go!

There are a couple of art-supplies I added for those long stretches in the car. We got these scratch-off note cards (which are printed on card-stock material). They are 4 x 4 inches and there are 125 cards in the packet. They are currently \$7.90 and I think the kids will have fun with these! [Mini Scratch Art Paper](#) (affiliate link)

I also picked up a couple of packs of modeling clay from the dollar store. My kids still love it (at ages 7 and 10)!!
