## Montessori 3-Part Cards

**Make 2 copies of the Montessori cards.** one card whole. Cut the other card into sections. Have the kids match both the picture and the name with the card.

You can place a small colored dot on the card and 2 pieces so children can check their own work.

Fold on the dotted  
line

Stegosaurus was a plant eater. It was up to 26 to 30 feet long and 9 feet tall. It had 17 bony plates embedded in its back. The plates ran along the Stegosaurus' back and tail in two rows. The plates alternated (one on one side, then one on the other). It had spikes at the end of its tail which were used for protection against predators. These spikes were up to 4 feet long! Fossils have been found in the US, Europe, India, China and southern Africa.

Glue information into the inside (or write your own).
